

Prowess Inc. Partners with Ignis Systems to Integrate Lab Orders and Results into New Oncology EMR|OIS|PACS

Prowess Inc., a California-based developer of software solutions for oncology practices, is partnering with Ignis Systems to integrate lab ordering and results into the company's soon-to-be-released Panther EMR|OIS|PACS solution.

Portland, Oregon ([PRWEB](#)) October 15, 2012 -- Prowess Inc., a California-based developer of software solutions for oncology practices, is partnering with Ignis Systems to integrate lab ordering and results into the company's soon-to-be-released Panther EMR|OIS|PACS solution.

The Panther solution extends Prowess' offerings, previously focused around radiation treatment planning, by providing practice management, ePrescribing, and patient charting to meet the needs of the entire oncology practice. The new offering, which will have a worldwide market, integrates OrdersAnywhere, Ignis' web-hosted CPOE (computerized physician order entry) solution, into the oncology workflow.

According to Prowess CEO John Nguyen, the company's decision to partner with Ignis was based on several key factors. "We looked at business philosophy, product capabilities, and the fact that Ignis supports all major U.S. labs plus many independent labs, and is continuously bringing in more. But I think the main factor was OrdersAnywhere's ease of use, which aligns well with Prowess' highly intuitive web-based user interface. Like ours, Ignis's approach is very straightforward, very user friendly."

Another success factor in the partnership is a harmonious development philosophy. Says Nguyen, "We've found the Ignis team to be very responsive and nimble. That agility is what's making this accelerated development process possible." Prowess plans to demonstrate its new offering at ASTRO, the annual meeting of the American Society for Radiation Oncology (Boston, October 28–31).

Says Ken Willett, Ignis Systems CEO, "The partnership with Prowess shows off OrdersAnywhere's ease of integration, as well as its capacity to work with a highly customizable specialty solution. We're excited about the worldwide visibility for our solutions that will come from this partnership with Prowess."

About Ignis Systems

Founded in 1999, Ignis Systems Corporation (www.ignisssystems.com) provides physician-centric solutions that integrate lab test services within the clinic's EMR. Used at over 450 practices by over 7,000 physicians nationwide, EMR-Link features out-of-the-box integration to the leading national reference labs and over 100 regional and hospital labs throughout the U.S.

About Prowess Inc.

For more than 20 years, Prowess Inc. has been trusted by doctors worldwide to provide advanced and innovative Windows-based software solutions: radiation treatment planning (TPS), oncology information system (OIS), record-and-verify (R&V), and expanding beyond the radiation workflow to include the entire oncology department's workflow needs.

Prowess Inc. is headquartered in Concord, California. Under the leadership of CEO John Nguyen, Prowess is the pioneer in Oncology software solutions, including its patented DAO IMRT technology, the only Real-time

Adaptive Radiation Therapy (RealART) planning, the very first in Windows 7/64 bit-based TPS, and a ribbon workflow driven interface throughout its product portfolio.
